

How to choose jets & sprays

Want a better way to water?
Jets and sprays will get the job done.

Find the right spray for you

To buy the best jets or sprays for your garden, consider the type, height and density of your plants.

Use sprays, mini sprinklers and spinners to water different areas. These offer a variety of spray patterns and throw diameters, so it's important to choose the one that's right for your garden. If your plants need different amounts of water, choose a variable flow spray or in-line tap to adjust the flow.

	Spray Jet	Microjet®	Veri-Flow Spray Jet	Mini Spinner	Eze-Jet	Vortex Jet 360° on Stake	Waterbird® VI Sprinkler on Stake
Use this table as a guide to select the best jet or spray for your needs							
	Designed to spray over foliage. Use with a 4mm rigid riser or riser stake for best results.	Emits thin streams of water for full coverage in densely planted garden beds, or for localised watering.	Used to vary the flow from each head rather than all heads on the line, giving your watering system greater versatility.	Offers different spray patterns and diameters of throw, to apply water over different areas.	A fully assembled micro spray on stake - ready to use with a 300mm stake and 450mm poly tube included.	Vortex Jets offer a 360° spray already pre-installed on a stake, for larger radius coverage.	A fully assembled mini sprinkler on stake with flexible tube.
Feature	Spray-type emitters can be connected directly into poly pipe or mounted on a rigid riser, making it easy to water above the ground.				Combined sprinkler heads and risers make it easy. Available in a range of heights and spray patterns, there's a riser combination to suit your watering needs.		
Spray pattern							
Radius of throw	1.0m	1.5m	1.5 - 2m	1.5m	1.5m	1.8m	3.45m
Flow rate	60 - 110 lph	40 lph	0 - 115 lph	115 lph	40 lph	78 lph	55 lph
Droplet size	medium	medium	medium	medium	medium	large	large
Pack size	10, 25, 50	10, 25, 50	5	5, 20	5	1	1

Get the job done

Pair sprays and jets with risers, stakes and poly tube to finish your setup.

- Rigid risers connect into 13mm poly pipe and elevate jets and sprays
- Rigid stakes hold 4mm poly pipe to raise jets and sprays to the right height

Pope Tip

Automate your irrigation with a tap timer
